本題可參酌下列資料回答：

CompStat (short for COMPuterizd STATistics) is a combination of management, philosophy, and organizational management tools for police departments. It is named after the New York City Police Department's accountability process and has since been implemented by many other police departments, both in the United States and abroad.

CompStat offers a dynamic approach to crime reduction, quality of life improvement, and personnel and resource management, whereby ranking police department executives identify spikes in crimes using comparative statistics and address those spikes through the use of targeted enforcement.
